

AHAD ALI BAIG

778-983-0283 | baig2@unbc.ca | linkedin.com/in/ahadalibaig | github.com/AhadAliBaig | ahadalibaig.me

PROFESSIONAL SUMMARY

4th Year Computer Science student passionate about **backend development** and scalable software engineering. Hands-on experience with **Python, Node.js, TypeScript, SQL**, and cloud platforms, building HTTP/REST APIs. Learning microservices-based architectures on Kubernetes with cloud platforms (AWS, GCP, Oracle Cloud), applying functional programming, and delivering reliable, high-performing solutions. Experienced in Agile teams, UX-aware design, and collaborative problem-solving.

EDUCATION

University of Northern British Columbia • GPA 3.90

Jan. 2023 – Present

B.Sc. Computer Science, Minor in Management Information Systems

Prince George, BC

- **Dean's List** (Sep. 2025) **Key Courses:** Software Engineering, System Design, Distributed Systems

EXPERIENCE

AI & Data Science Intern | Aga Khan University, Global Health

Jun. 2025 – Present

Central Africa & Central Asia (Remote / Hybrid)

- Developed a prototype AI healthcare agent using **LLM, LiveKit, and Flask** for user interaction, improving accessibility.
- Built predictive models for dengue cases using epidemiological and climate datasets, and visualized trends on **GIS maps** achieving **85–90% accuracy** and supporting data-driven decision-making.
- Documented workflows, optimized API integrations (**HTTP/REST**), and collaborated with cross-functional teams to ensure performance, and maintainable solutions.

Research Assistant, Robotics Lab | University of Northern British Columbia

Jan. 2025 – Present

Prince George, BC

- Developed and deployed research web applications on **QTrobot** using **Python, Flask, ROS 2**, leveraging LLM-guided responses to increase exercise completion rates by **30%**.
- Built **EmotAI**, a social robotics game with **Django, Python, JavaScript, HTML/CSS**, incorporating emotion-recognition for children with special needs, improving engagement by **20–35%**; followed Agile sprints for iterative development.
- Conducted QA testing, developed documentation and training materials, and researched the impact of social robots on fitness applications, ensuring reliable solutions.

PROJECTS

Jobtrackr | Angular, TypeScript, Node.js, Express.js, PostgreSQL, RESTful API | [Jobtrackr.com](https://jobtrackr.com)

Sep. 2025 – Dec. 2025

- Built a full-stack job tracking platform with **Angular** and **Node.js/Express.js** backend, replacing manual spreadsheets and improving efficiency by **60%**, applying functional programming concepts.
- Integrated APIs to compare resumes against job descriptions, raising keyword match scores by **35%** and cutting review time from **10 mins to 30 seconds**, demonstrating strong problem-solving and service-oriented design.
- Delivered UX-friendly development features to ship an AI-powered cover letter generator with TypeScript, producing tailored letters in under **30 seconds**, emphasizing innovation and professional growth.

Credit Card Fraud Detection | Python, scikit-learn, TensorFlow/Keras, SMOTE, REST API | [GitHub](https://github.com)

Sep. 2025 – Dec. 2025

- Implemented end-to-end fraud detection pipeline on **284K+ transactions (0.2% fraud)**, leveraging scalable ML models with performance and reliability focus.
- Compared logistic regression and MLP architectures, tuned thresholds, and used clear reporting for stakeholders, demonstrating teamwork, communication, and problem-solving skills.

Personal Portfolio Website | Oracle Cloud, VCN, DNS, React, HTTP, Containers | ahadalibaig.me

Sep. 2025 – Present

- Deployed portfolio website on **Oracle Cloud** with containers, and **CI/CD pipeline**, ensuring **99%+ reliability**, monitoring, and maintainability, following Agile processes.
- Implemented a **CI/CD pipeline** for automated testing and deployment, integrated monitoring and logging, and ensured secure, and high-performing cloud infrastructure, demonstrating DevOps practices.

TECHNICAL SKILLS

Programming & Scripting: Python, Java, JavaScript, TypeScript, Scala (learning), SQL, C, Bash, PowerShell, Tailwind CSS

Web, Frontend & Backend: React, Angular, Redux, Node.js, Express.js, REST API, HTTP services, UX/UI, microservices, service-oriented architecture, distributed systems, functional programming, Akka/Pekko (learning)

Cloud, DevOps & Tools: AWS, GCP, Oracle Cloud, Kubernetes, containerization, CI/CD pipelines, monitoring & logging, GitHub, JIRA, agile methodologies
